**ABSTRACTED-PUB-NO:** WO 200026811A

**BASIC-ABSTRACT:**

NOVELTY - The data packet including information to generate user
interface and to input document information such as printed page, tab
page, front cover, back cover and binding, is transmitted to remote
terminal. Then, the information in data packet is verified whether it
is physically possible to create a document. If so, then the
corresponding information from remote terminal is received and
document is obtained.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the
following:

(a) apparatus for obtaining processing and routing information for
creating document;

(b) program for document production

USE - For producing document to create text, image to be stored in
magnetic disk, magnetic tape, optically readable media such as CD
ROM, PCMCIA cards etc. Also for small disk, diskette cassette, etc.
used in computer workstation, laptop computer, special purpose
computing equipment.

ADVANTAGE - Increases efficiency by automatically formatting order
information to facility routing and/or document assembly. Eliminates
need for document author to physically visit document production
location, hence facilitates efficient production and delivery of
document.

DESCRIPTION OF DRAWING(S) - The figure shows the windows in graphic
user interface.
